

ACVATIX™

Rotary actuators for ball valves

GLD161.9E..

**Electromotive rotary actuators for modulating control.
Used in heating, ventilation and air conditioning plants.**

- For 2-port and 3-port control ball valves, internally threaded connections (VAI61.. and VBI61..) or externally threaded connections (VAG61.. and VBG61..), DN15...50
- Nominal torque 8 Nm
- Operating voltage GLD161.9E AC 24 V ~ / DC 24...48 V =
- Operating voltage GLD161.9E/MO AC 24 V ~ / DC 24 V =
- GLD161.9E/MO: RS-485 for Modbus RTU communication
- Pre-wired with 0.9 m long connection cables

Features

- Brushless, robust DC motors ensure reliable operation regardless of load.
- The rotary actuators do not require an end position switch, are overload proof, and remain in place upon reaching the end stop.
- The gears are maintenance free and low noise.
- Suitable for use with modulating controllers (DC 0/2...10 V).

Functions

Function	161.9E	161.9E/MO
Control type	Modulating control (0/2...10 V)	Modbus RTU
Rotary direction	Clockwise or counter-clockwise direction depends on the setting of the rotary direction DIL switch  ... on the positioning signal. The actuator remains in the achieved position: ... if the control signal is maintained at a constant value ... for loss of operating voltage.	-
	NC (normally closed) ball valve	-
	DIL 3 set to "counter-clockwise" (ccw) Flow = 0% at Y = 0 V Flow = 100% at Y = 10 V	-
	NO (normally open) ball valve	-
	DIL 3 set to "clockwise" (cw) Flow = 100% at Y = 0 V Flow = 0% at Y = 10 V	-
Position indication: Mechanical	Rotary angle position indication by a position indicator/hand lever.	
Position indication: Electrical	Output voltage U = DC 0/2...10 V is generated proportional to the rotary angle. U depends on the rotary direction of the DIL switch setting.	
Self-adaptation of linear span	When self-adaptation is active, the actuator automatically determines the mechanical end positions of the linear span.	
Manual adjustment	The rotary actuator can be manually adjusted by pressing the gear train disengagement button.	
Rotary angle limitation	The rotary angle of the shaft adapter can be limited mechanically with a set screw.	
Modbus RTU (RS-485), not galvanically isolated		Setpoint 0...100 % valve position Actual value 0...100 % for valve position Override control Open / Close / Min / Max / Stop Setpoint monitoring and backup mode

Technical design

Housing

The housing consists essentially of flame retardant, non brominated, non chlorinated glass fibre reinforced plastic.

Notes

Safety

	⚠ Caution
	National safety regulations Failure to comply with national safety regulations may result in personal injury and property damage. - Observe national provisions and comply with the appropriate safety regulations. - Use only properly trained technicians for mounting, commissioning, and servicing.

Mounting

Both ball valve and rotary actuator can easily be assembled at the mounting location. Neither special tools nor adjustments are required.

Orientation

Protection against weather, humidity and dirt

		
Protection against direct sunlight and rain	Correct mounting position and cable connection	Protection only with closed cover!

Installation

	⚠ WARNING
	No internal line protection for supply lines to external consumers Risk of fire and injury due to short-circuits Adapt the line diameters as per local regulations to the rated value of the installed fuse.

Engineering

If condensation occurs at the mounting site, the use of the temperature adapter ALJ100 is recommended in order to protect the actuator. If the medium temperature is $\leq 0\text{ }^{\circ}\text{C}$, the adapter shaft must be greased with silicon grease.

GLD161.9E/MO

The Modbus converter is designed for analog control at 0...10 V.

Commissioning

When commissioning the system, check wiring and the functions of the rotary actuator.

Manual adjustment

The rotary actuator can be manually adjusted into any position between 0° and 90° by pushing the gear train disengagement slider.

If a control signal from the controller is present, this will take priority in determining the position after the slider is released.

For manual adjustment: Power off!

Maintenance

The actuators GLD161.9E.. are maintenance-free.

Disposal

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
